In-Person & Internet Voting

Council approved in-person & internet voting as the voting method for the 2022 Municipal Election. Internet voting method best supports greater convenience by providing the most flexibility and opportunity for participation; improved accessible voting options; help centres will be located in places like libraries, community centres and other places to promote the election, add electors to the Voters' List, assist voters with information, and offer access to a telephone or computer for voting; elimination of spoiled ballots; superior accuracy of the count; preservation of secrecy; facilitation of participation by non-resident electors; and improved cost effectiveness.

How does it work?!

1. Electors would confirm they are on the Voters' List.
2. In early October, each elector will receive a personal **voter notification letter** containing information to access the voting system by internet or telephone, including the voter's ID number, the voter's unique PIN to vote, a URL and telephone number for the voting system and voting information, i.e. candidates running for office, location of help centres, legal requirements to vote, how to find more information, etc.
3. Electors will be required to confirm they are entitled to vote when accessing the system. The user must enter his or her ID and PIN number provided on the notice and will follow the prompts and confirm his or her selections.
4. Help Centres will be located in places like our community centres or other places to promote the election or assist voters. Help Centres can also add an elector to the Voters' List, provide assistance and clarification on the election process, offer access to a telephone or computer for voting and assist voters needing assistance.
5. Results may be available earlier on election night!
