

Installation of speed control measures on \_\_\_\_\_ (Street Name),

Between \_\_\_\_\_ (Cross St. A) and

\_\_\_\_\_ (Cross St. B)

## NOTICE OF PUBLIC INFORMATION CENTRE

The City of Thorold has initiated a study for the installation of speed control measures. In response to concerns related to through traffic infiltration and excessive operating speeds along the identified section of \_\_\_\_\_ (Street Name) corridor, speed hump installation is being considered. (if AWCS being proposed, note here with location).

The purpose of this study is to identify any select the preferred location for each speed hump installation on the subject portion of \_\_\_\_\_ (Street Name), taking into account the safe and efficient movement of the vehicular, pedestrian and bicycle traffic while remaining sensitive to the needs of adjacent land uses and the environment.

The goal of this study is to achieve a clear understanding of community issues and expectations and to ensure that all study-related concerns are addressed and captured, and to identify the preferred technical solution and achieve a consensus for speed hump installations which will satisfy the concerns and issues affected stakeholders/agencies and the public.

A public Information Centre (PIC) is being held to provide Stakeholders, agencies, and interested members of the public with an opportunity to meet the Study Team, review the study scope and discuss issues related to the study including recommended solutions. The PIC has been scheduled for:
